

Shelby CTX™ for Vertex: Accelerate integration of Vertex's Tax Automation Solution with Coupa Procurement

Shelby CTX™ for Vertex is a combination of licensed software and custom services that accelerate the integration of Vertex's Tax Automation Solution to Coupa's Procurement Platform.

SHELBY CTX SOFTWARE:

Shelby CTX software is comprised of three main components:

1. Coupa "Call back" Listener
2. Translation Engine
3. Vertex REST API Connector

The custom cloud based Listener accepts invoice tax data from Coupa. The Translation Engine converts Coupa invoice data to Vertex specific data. The tax detail is generated within Vertex and then sent back via the REST API, converted by the Translator into Coupa invoice data and returned to the Coupa invoice.

SHELBY CTX SERVICES:

Effective integration execution requires a unique combination of procurement experience and technical expertise. Our Procurement Optimization services allow Shelby CTX software to be tailored to meet your unique business processes. Shelby CTX Services include:

- Commodity code mapping to Vertex
- GL code mapping to Vertex
- Ship-to and Ship-from addresses loading into Vertex

SHELBY CTX BENEFITS:

Improved Value

- Shelby CTX speeds deployment, intelligently connecting the Vertex Tax Engine to the Coupa Procurement Platform
- A reduction of costs compared to traditional software integration development leveraging the CTX framework

Operational Efficiency

- Shelby CTX works behind the scenes allowing "near real-time" Coupa to Vertex data movement at the push of a button
- No more manually loading tax info into Coupa

Confidence

- The Shelby Group is a certified Coupa implementation partner, with 100% Coupa certification of its consulting staff, and hundreds of deployments
- The Shelby Group is expert in implementing the Vertex Tax Automation solution
